many books have covered the topics of architecture materials and technology new architecture and technology is the first to explore

the interrelation between these three subjects it illustrates the impact of modern technology and materials on architecture the book explores the technical progress of building showing how developments both past and present are influenced by design methods it provides a survey of contemporary architecture as affected by construction technology it also explores aspects of building technology within the context of general industrial social and economic developments the reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design

how the blockchain a system built on foundations of mutual mistrust can become trustworthy the blockchain entered the world on january 3 2009 introducing an innovative new trust architecture an environment in which users trust a system for example a shared ledger of information without necessarily trusting any of its components the cryptocurrency bitcoin is the most famous implementation of the blockchain but hundreds of other companies have been founded and billions of dollars invested in similar applications since bitcoin s launch some see the blockchain as offering more opportunities for criminal behavior than benefits to society in this book kevin werbach shows how a technology resting on foundations of mutual mistrust can become trustworthy the blockchain built on open software and decentralized foundations that allow anyone to participate seems like a threat to any form of regulation in fact werbach argues law and the blockchain need each other blockchain systems that ignore law and governance are likely to fail or to become outlaw technologies irrelevant to the mainstream economy that werbach cautions would be a tragic waste of potential if however we recognize the blockchain as a kind of legal technology that shapes behavior in new ways it can be harnessed to create tremendous business and social value

through the brilliant photography of richard schulman and an insightful introduction by new yorker critic paul goldberger portraits of the new architecture celebrates the 50 architects who have reinvented architecture in the 20th and 21st centuries from philip johnson and i m pei to richard meier and daniel liebeskind portraits emphasizes the magnetism of the architects as well as their creations with highly personalized representations of the architects themselves and images and design plans of their best work the book explores the architect as superstar phenomenon what does it mean that architecture today has become a style statement illustrated

volume 1 35 works volume 36 37 letters volume 38 provides an extensive bibliography of ruskin s writings and a catalogue of his drawings with corrections to earlier volumes in george allen s library edition of the works of john ruskin volume 39 general index
