storytelling a tradition that built human civilization may soon destroy it humans are storytelling animals stories are what make our societies possible countless books celebrate their virtues but jonathan gottschall an expert on the science of stories argues that there is a dark side to storytelling we can no longer ignore storytelling the very tradition that built human civilization may be the thing that destroys it in the story paradox gottschall explores how a broad consortium of psychologists communications specialists neuroscientists and literary quants are using the scientific method to study how stories affect our brains the results challenge the idea that storytelling is an obvious force for good in human life yes storytelling can bind groups together but it is also the main force dragging people apart and it's the best method we've ever devised for manipulating each other by circumventing rational thought behind all civilization's greatest ills
